Nebraska LPN IV Therapy Course

- ◆ LPNs: There are new state licensure regulations that affect you. Every LPN who graduated before May 2016 or has not successfully completed the LPNC course must complete an approved 8-hour didactic course on IV therapy within the next five years. If you wish to practice IV therapy, **you must take both an approved 8-hour didactic IV therapy course and hands on approved IV therapy skills course.**
- ◆ The 8-hour course, at Vascular Access Plus LLC, meets the didactic portion of the new requirement for all LPNs with a well- rounded review of IV therapy. Topics covered will be **legal aspects of IV therapy, peripheral IVs insertion and central lines care and maintenance.** *(Two 4 hour classes will be available for facility staffing needs)*
